CHRISTOPHER REVAK PRIMARY EXAMINER

CU 3/26/06

Petitions to revive under 37 CFR 1,137(a) or (b), or requests to withdraw the holding of abandonment under 37 CFR 1,181, should be promptly filed to minimize any negative effects on patent term.

Appl. No. 11/095,542

TES PATENT & TRADEMARK OFFICE IN THE UNITED ST

Appl. No.:

11/095,542

Applicant:

LAMBERT, Robert J. et al.

Filed:

April 1, 2005

Title:

Method For Accelerating Cryptographic Operations on Elliptic Curves

Art Unit:

2131

Examiner:

Not Yet Assigned

Docket No.: 67539/00590

Mail Stop Amendment U.S. Patent & Trademark Office Commissioner for Patents P.O. Box 1450 Alexandria, VA 22313-1450

VOLUNTARY AMENDMENT

Sir:

Prior to consideration by an Examiner, Applicant wishes to amend the above-identified application as follows:

Amendments to the Claims: are reflected in the listing of claims which begins on page 2 of this paper.

Remarks: begin on page 4 of this paper.

Amendments to the Claims

This listing of claims will replace all prior versions and listings of claims in the application:

<u>Listing of claims</u>:

- 1.-16. (cancel)
- 17. (new) A method of calculating the sum of a plurality of point-multiples in a cryptographic scheme, said point multiples including the multiplication of respective scalars and respective points on an elliptic curve, said method comprising the steps of:

for each said plurality of point-multiples, computing a table of small multiples, said small multiples representing the multiplication of values smaller than said scalars and said points;

simultaneously windowing said scalars while reviewing corresponding bits of said scalars from a most significant bit thereof to a least significant bit thereof;

for each window encountered during said windowing, adding a corresponding one of said small multiples from its respective table to an accumulator; and

performing a doubling operation of said accumulator at each bit where the current bit from at least one of said scalars is zero.

- 18. (new) A method according to claim 17 wherein prior to said step of computing said tables, said method comprising the step of recoding said scalars from a binary representation to a signed binary representation.
- 19. (new) A method according to claim 18 wherein said signed binary representation is a Non-Adjacent Form (NAF).
- 20. (new) A method according to claim 17 wherein said windowing comprises one of a sliding window and a fixed window.

- 21. (new) A method according to claim 17 comprising a pair of point multiples in a signature verification scheme.
- 22. (new) A method according to claim 17 wherein the size of said tables is determined according to said windowing.

REMARKS

Claims 1-16 are cancelled and new claims 17-22 are added. Support for new claims 17-22 can be found in paragraphs [0084] to [0099] of the present application as published. No new subject matter is believed to have been added by way of these amendments.

Respectfully submitted,

John R.S. Orange Agent for Applicant Registration No. 29,725
